Cloud Data Protection

Your data is at risk of being deleted, even when it's stored in the cloud. Every day, people delete business data, sometimes deliberately, often by accident. No matter where it was stored, this data becomes lost to your business.

Cloud storage offers massive benefits in cost and flexibility, but it doesn't include unlimited undelete capability. Which is why we provide the Cloud Data Protection Service, as a safety net against losing data.
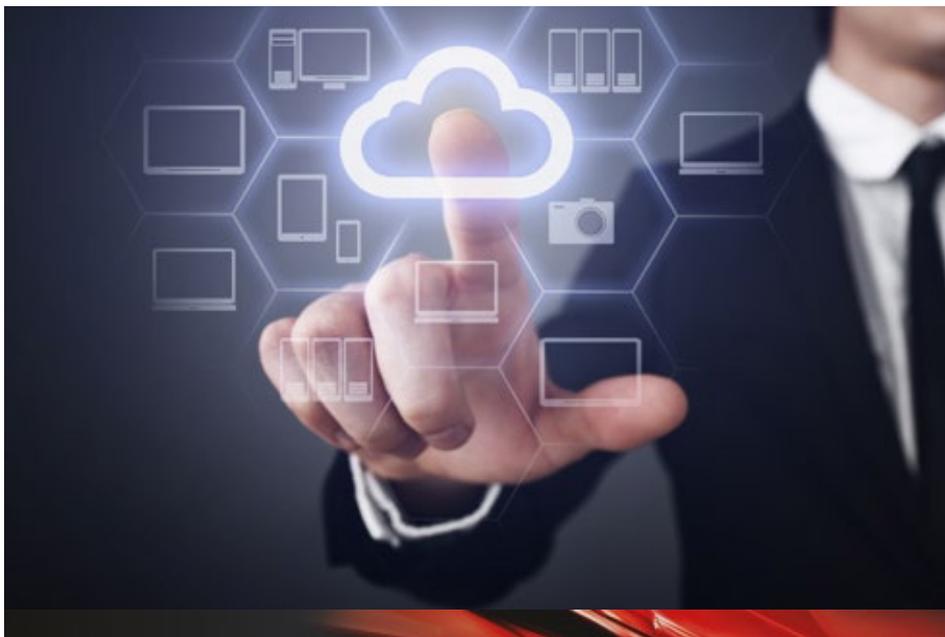

The Cloud Data Protection Service is a backup service that protects your entire Office 365 installation, including mailboxes and emails, against the risk of data loss. Securing your data helps to protect your productivity and reputation, and improves corporate compliance.

BENEFITS OF CLOUD DATA PROTECTION SERVICE

- Improved productivity through automation of data protection and recovery.
- One-click restore of specific data files.
- Unlimited backup of your firm's data, with up to 6 daily data snapshots.
- Easy to manage, including adding and removing users.

HOW CLOUD DATA PROTECTION SERVICE CAN HELP YOU

- Recover quickly from malicious or erroneous deletion of data.
- Avoid failure to be regulatory compliant due to data loss.
- Become more competitive by reducing time spent on manual data management.

CLOUD DATA PROTECTION SERVICE IN SUMMARY

- A robust addition to the snapshot and undelete features within Office 365.
